# Network Video Recorder Quick Start Guide

- Please read this instruction carefully before using the product and keep it for further reference.
- All the examples and pictures used here are for reference only.
- The contents of this manual are subject to change without notice.

• This device should be operated only from the type of power source indicated on the marking label. The voltage of the power must be verified before using the same.

### 1. Packing Check

Please check the device and the accessories after getting the device. If there are any damages, shortages or defects, please contact your dealer immediately.

## 2. HDD Installation

This series of the product supports 1 SATA hard drive. Please make sure that the device is powered off before the installation. The pictures of the installation are only for reference, please take the real object as the standard.

- 1 Loosen the screws to open the cover.
- ② Screw the screws into the HDD but not tighten them.
- 3 Place the HDD onto the bottom of the machine.
- ④ Turn over the machine and secure the HDD with the screws.
- ⑤ Connect the power and data cables.

<sup>(6)</sup> Install back the cover and secure it with the screws.

**Tips:** Please check the inside structure of the device and make sure the cables connected well before installing the cover back. Please format the HDD before using.

# 3. Rear Panel Instruction

#### The interfaces of the rear panel are for reference only.

Name	Description	
DC48V	Connector for power input	
PoE Ports	PoE network ports; connect to PoE IP cameras	
LAN	Network port	
VGA	Connect to monitor	
HDMI	Connect to high definition display device	
USB	Connect to USB storage device or USB mouse	
AUDIO OUT	Audio output	
AUDIO IN	Audio input	
P/Z	P/Z; Connector for PTZ	
K/B	K/B; Connector for keyboard	
ALARM IN	Alarm input; connectors for sensors	
ALARM OUT	Alarm output	
GND	Ground	

# 4. Startup & Shutdown

#### ► Startup

- ① Connect the monitor and the power.
- 2 The device will boot and the power indicator will display blue.
- ③ A wizard window will pop up.

#### ▶ Shutdown

Click "Start" and then select "Shutdown" icon. This will bring up a shutdown window. The device will shut down by clicking "OK" button. Then disconnect the power.

### 5. System Login

You must configure the wizard if you start the NVR for the first time. After you read the privacy statement, click "Wizard Setup" to start Wizard. Then set the data, time and zone as needed. After that, set the login password.

	Wizard
	Admin Password Setup
Username	admin 🗸
New Password	xxxxxx
Confirm Password	xxxxxx
Pattern Lock	Display Password Log In Automatically Enable
	Previous Next

The default username is *admin*. Set your own password when you use the wizard for the first time. Enable pattern lock and click "Edit" to set the pattern lock. Then set security questions and answers. It is important for you to remember these answers, or you will not be able to reset your password. Click "Next" to continue.

### 6. Network Configuration & Add IP Camera

1 In the above wizard interface, click "Next" to set the network.

Enter IP address, subnet mask, gateway, etc. If using DHCP, please enable DHCP in both the NVR and the router.

<sup>(2)</sup> Enter HTTP port (the default value is 80) and server port (the default port is 6036).

③ The internal ethernet port is the port which connects all the PoE ports with the NVR system. The PoE ports are available if the internal ethernet port is online; if it is offline, all the PoE ports will be unavailable. The IP address and subnet mask of the internal ethernet port can be changed to make the port in the same network segment with the IP cameras which directly connect to the PoE ports of the NVR.

Wi	izard
Network Settings >	
Ethernet Port 1 ( Online )	Internal Ethernet Port (Online )
Obtain an IP address automatically	
Address 192.168.1.2	Address 192.168.1.3
Subnet Mask 255.255.255.0	Subnet Mask 255 . 255 . 0
Gateway 192.168.1.1	
Obtain DNS automatically

(5) Click **D** to edit an IP camera as shown on the above left. Enter the new IP address, subnet mask, gateway, username and password of the camera. Click "OK" to save the settings.

Click 🖬 to edit the added camera as shown on the above left. Enter the new camera name, IP address, port, username and the password of the camera. You can click "Test" to test the effectiveness of the input information. Click "OK" to save the settings. You can change the IP camera name only when the added camera is online. Click "Next" to continue.

### 7. Disk Settings

You can view the disk number, disk capacity of the NVR and serial number, Read/Write status of the disk. Click "Formatting" to format the disk. Click "Next" to continue.

### 8. Record Settings

Two record modes: auto and customization.

Auto Mode: Select one auto mode in the interface as shown below and then click "Next" to save the settings. Click "Advanced" to self-define a record mode.

Customization: Set the record of each camera, such as "Sensor Record", "Motion Record", "AI Record", etc. Please enable the record as needed. Click "Next" to continue.

# 9. NAT

You can enable the NAT function in the interface or set it in the network configuration after exiting the wizard. You can scan the QR code through the mobile surveillance APP for iOS or Android to easily view your cameras.

#### ► Web Access Through NAT Function

Go to Start  $\rightarrow$  Settings  $\rightarrow$  Network  $\rightarrow$  NAT tab. Enable NAT and select the NAT access type(NAT1.0 or NAT2.0). Click "Apply" to save the parameters.

NAT		
Enable Enable		
Access Type	NAT1.0(d2.autonat.com:20002)	~
Visit Address	www.autonat.com	
NAT Status	Success	
		Apply

Enter the visit address in the address bar of your browser and then press enter to go to the following interface. If you are the first time to access the NAT, you shall download and install the plug-in according to the popup tips. After installing the plug-in successfully, it will appear the login box.

	Enter device serial number
<u>+</u>	Enter Username
	Enter Password
	Login

**Device Serial Number**: Click on the menu bar at the bottom of the live interface to check the serial number.

**Username**: The username of the NVR. The default username is admin. **Password**: The password of the NVR. The password is set by yourself when you configure the wizard for the first time.

# 10. Cloud Upgrade

Before using this function, please enable NAT2.0. Then click "Cloud Upgrade" in the wizard interface. Go to Start →Settings →Network → Cloud Upgrade interface and click "Upgrade" to upgrade your device if it is not the latest version.

# 11. Manual Recording

Before recording, please install a HDD. In the live interface you can see the menu toolbar. Click 🖾 button to start recording. Click it again to stop recording. You can also click 🗳 to check the status of the recording.

# 12. Playback

#### ► Instant playback

Click □ on the tool bar at the bottom of the preview camera window to play back the record from 5 minutes ago or right click to select "Instant Playback" and then select the instant playback time to play back the record.

### General playback

Click  $\bigodot$  on the tool bar at the bottom of the live view interface or click Start  $\rightarrow$  Playback to go to the playback interface as shown below. You can also add the playback cameras manually. Click  $\blacksquare$  in the playback window to pop up the "Add Camera" window. Check the cameras in the window and then click "Add" to add playback camera. The record files of the added playback camera will be played in the playback interface.
