Hybrid DVR **Quick Start Guide**

1. Notes

• Please read this instruction carefully for correct use of the product and preserve it for reference purposes.

• All the examples and pictures used here are for reference only.

• There may be several technically incorrect places or printing errors in this manual. The updates will be added into the new version of this manual. The contents of this manual are subject to change without notice.

• This device should be operated only from the type of power source indicated on the marking label. The voltage of the power must be verified before using the same.

2. HDD Installation

This series of the product supports 1 SATA hard drive. Please make sure that the device is powered off before the installation. The pictures of the installation are only for reference, please take the real object as the standard.

(1) Loosen the screws to open the cover.

(2) Get the HDD ready.

(3) Put the HDD onto the bottom of

the device.

(4) Connect the power and data cables.

(6) Install back the cover and secure it with the screws.

4. Startup & Shutdown

► Startup

(1) Connect the monitor and the power.

(2) The device will boot and the power indicator will display blue.

A wizard window will pop up.

► Shutdown

Go to "Main Menu" and then select "Shutdown" icon. This will bring up a shutdown window. The device will shut down by clicking "OK" button. Then disconnect the power.

5. Login

The default username is admin and the default password is 123456. You must configure the wizard if you start the DVR for the first time and you may change the password when you configure the wizard for the first time. You can skip the settings of wizard next time. Click "Start" and select "Login". This will take you to see a login box. Input default username and password you set and you can

	Edit Security Ouestion	Login Cancel

6. Analog Camera Connection

First connect the camera to the DVR. Then go to Start \rightarrow Settings \rightarrow Camera \rightarrow Manage Camera \rightarrow Signal Access Set to checkmark the video mode. The actual signals input shall correspond to the video mode. Please refer to User Manual for details.

7. Network Configuration & Add IP Camera

After you finish adding IP cameras, you can see the live images through the monitor of the DVR. The following will mainly introduce how to add the IP cameras via LAN/WAN.

► LAN

(1) Set the network of the DVR. Go to Start \rightarrow Settings \rightarrow Network \rightarrow TCP/IP. Input IP address, subnet mask, gateway, etc. If using DHCP, please enable DHCP in both the DVR and the router.

(2) Go to Start \rightarrow Settings \rightarrow Network \rightarrow Port. Input HTTP port (the default value is 80), server port (the default port is 6036).

(3) Click "Apply" to save the settings.

TCP/IP Port	PPPoE DDNS	E-mail UPnP	NAT Telnet	t Wireless	×
IP Address S	ettings				
Ethernet Port :	(Online) IPv4 address automaticall		Obtain an II	Pv6 address automatically	
Address	192 . 168 . 1 .		Address	Pv6 address automatically]
Subnet Mask	0.0.0.	•	Mask Length	<u>ه</u>]
Gateway	192.168.1.	1	Gateway		
мто					
Obatin DN Preferred DNS	S server address automa	-			
Alternate DNS	192.168.1. 0.0.0.	0			

(4) Go to Start \rightarrow Settings \rightarrow Camera \rightarrow Add Camera. The DVR will automatically refresh the cameras searched. The IPC which supports the Onvif protocol may be added manually. If the IPC searched is not in the same local network as the DVR, you should select the device and click I to modify the IP address.

OK Cance

3. Rear Panel Instruction

(5) Turn over the machine and secure

the HDD with the screws.

The interfaces of the rear panels are for reference only.

► WAN

(1) Set the network of the DVR. Go to Start \rightarrow Settings \rightarrow Network \rightarrow PPPoE. Input static IP address or enable PPPoE and then input the user name and password received from your ISP.

(2) Go to Start \rightarrow Settings \rightarrow Camera. Click "Add Camera" or \blacksquare behind the column of the search camera and select "Manually Add" to add the IP cameras. Input IP address, server port, username and password of the IP camera. The IP camera must be connected over WAN. And here the IP address of the IP camera must be a WAN IP address.

8. UPnP

You can use the UPnP function to enable the fast connection of the device to WAN via a router without port mapping.

(1) Go to Start \rightarrow Settings \rightarrow Network \rightarrow UPnP, and enable UPnP and then click "Apply" button to save.

② Enable the UPnP function in the router.

③ Click "Refresh" button to refresh the UPnP status. If the UPnP status were still "Invalid UPnP" after refreshing it for several times, the port would be wrong. Please change the mapping type to "Manual" and then click ☐ to modify the port until the UPnP status turns to "valid UPnP".

9. NAT

► NAT Settings

(1) The DVR shall be powered on and connected to the network.

② Go to Start \rightarrow Settings \rightarrow Network \rightarrow TCP/IP. You can obtain the IP address, subnet mask and gateway automatically. You can also manually enter them according to the actual network situation. Please make sure the network segment is the same as that of the network which is used.

③ Set the preferred or alternative DNS Server. Click "Apply" to save the parameters.

(a) Go to Start \rightarrow Settings \rightarrow Network \rightarrow NAT tab. Enable NAT and select the NAT Server Address (The default NAT Server Address is *nat.autonat.com*). Click "Apply" to save the parameters.

TCP/IP Port PPP	oE DDNS	E-mail	UPnP	<u>NAT</u>	Telnet	Wireless	×
NAT							
Visit Address 🔽 Enable	www.autor	at.com					
NAT Server Address	nat.autona	at.com					

► NAT Access

After finishing the NAT settings, you can input *www.autonat.com* in the IE address bar and then press enter to go to the following interface. If you are the first time to access the NAT, you shall download and install the ActiveX according to the popup tips. After installing ActiveX successfully, it will pop the login box.

	Enter device serial number
1	Enter Username
	Enter Password

Device Serial Number: Click on the menu bar at the bottom of the live interface to check the serial number or go to Start → Settings → Network → Network Status to check the serial number of the DVR).
Username: The username of the DVR. The default username is admin.
Password: The password of the DVR. The password is set by yourself when you configure the wizard for the first time.

10. Manual Recording

Before recording, please install and format a HDD. In the live interface you can see the menu toolbar. Click again to start recording. Click it again to stop recording. You can also click 🗊 to check the status of the recording.

로 () 🗄 🗒 🖾 📀 🞇 💿 / 着 🗐 🗖

11. Playback

► Instant playback

Click "Instant Playback" in the right-click menu of the camera's preview window to select or drag the playback progress bar to change the playback time to play back the record.

General playback

Click \bigcirc on the tool bar at the bottom of the live preview interface or click Start \rightarrow Playback to go to the playback interface as shown below. You can also add the playback cameras manually. Click \blacksquare in the playback window to pop up the "Add Camera" window. Check the cameras in the window and then click "Add" to add playback camera. The record files of the added playback camera will be played in the playback interface.
